Did You Know?

The internal walls of **The Presidential Tower** will be made of **Aerocon bricks** also known as **AAC** (Autoclaved Aerated Concrete). These bricks/blocks are **uniform in shape** and have **denser composition** from normal bricks. It does not require plastering, offers greater **fire resistance**, have better **sound proofing** capability and are **lighter in weight** than any other conventional bricks/blocks.

WELCOME TO THE WORLD OF INSIGNIA

The referral program at CNTC India Projects. Unlike normal referral programs, we understand what drives our patrons? What is important to them and what is not.

Sometime money is not a motivator, and that's exactly is the case with our upscale buyers. Hence we went ahead and devised a referral plan which gives our buyers an experience of a lifetime along with a substantial amount of cash if we convert their referrals into sales.
